

# java-webservice-hw

Java Web Service - 1.6

version :1.0.0

*java webservice hw*

## COREMODULE

### **gson**

Gson is a Java library that can be used to convert Java Objects into their JSON representation. It can also be used to convert a JSON string to an equivalent Java object. Gson can work with arbitrary Java objects including pre-existing objects that you do not have source-code of. Gson support java generics and doesn't require any special annotations.
